## Horserug Drying System

Horserug drying system, extremely valuble. The rugs are easily draped over and secured onto the rack. Its perfect shape and heating capacity dries your rugs within a few hours. Due to the design and placement of the tubes, the heat output is evenly distributed to accelerate the drying process. By putting the rug rack in an upright position, you can add items like saddle pads, tendon and fetlock boots and have them dry within minutes. This simple method of quick and easy drying prolongs the life of the rugs, saddle pads and other gear. At the same time it limits the quantity of rugs required on a daily basis. Last but not least - our heating system automatically powers off after 3 hours. Your rugs are perfectly dry and ready for use.
