Indoor and Outdoor Arena Mirrors

## Columbus indoor and outdoor arena mirrors support your training!

Our high quality indoor and outdoor arena mirrors are available with a wooden or aluminium frame and a double layer insulation. The layer of polypropylene on the rear of the mirror is applied by an industrial process. If a sudden break occurs the glass shards will stick to the vinyl layer. This way the safety of horse and rider are insured.

- High impact and break resistance
- Thermal insulation due to insulation materials
- Fire safety properties classified as B1, which is possible due to special composites
- Quick, easy and cost-effective installation
- The solid wooden frame offer an ideal edge protection and ensures strainless suspension

We offer you the ideal indoor and outdoor mirrors in many different sizes, with or without covers (made in one piece in every RAL colour, electronic or hand-operated).
