

The MaXuSS Series

MaXuSS Zephyr

MaXuSS Zephyr – blow drier

The **MaXuSS** Solarium Series is made of a high-quality and heat-resistant plastic casing and the basic model consists of three parts. The rear and front parts can be moved separately and thus be positioned according to the precise shape of your horse. The combination of infrared (IR) lamps and fans ensure a pleasant thermal blanket between the solarium and your horse. The IR lamps are embedded into the body of the solarium which minimized the danger of contact with the warm bulbs.

Zephyros is the old Greek name for “west wind” which served as eponym for the **MaXuSS Zephyr**. This solarium is mainly a blow drier which will dry your horse gently within minutes.

The **MaXuSS Zephyr** consists of a total of 9 hot-air blowers. You can choose between two air velocities and two temperature settings. This way you can adjust the settings for each horse differently. The 6 IR lamps supply pleasant warmth and stimulate the bloodflow in the muscles.

Also available as “Pro” version with additional side modules and as “Thera” version with colour therapy!

The **MaXuSS** Series consists of the following models:

MaXuSS 230	basic model
MaXuSS 400	basic model – as 230 with more power
MaXuSS W400	thinner than 230 / 400, has IR halogen spotlights instead of conventional IR lamps
MaXuSS TWIN	two MaXuSS Solariums are fused to one big solarium
MaXuSS Pro 230	the basic model 230 with 6 additional side modules consisting of 2 IR lamps each
MaXuSS Pro 400	the basic model 400 with 6 additional side modules consisting of 2 IR lamps each or optionally modules with hot-air blowers
MaXuSS Zephyr	Equine blow drier with 6 IR lamps and 9 hot-air blowers
