

SOLARIUM EXTRAS

Coin device

Every owner of a riding school or livery yard would like to offer their customers the best stable equipment, but also need to keep an eye on the costs. With a COLUMBUS coin device you are able to do that. The device is installed between the power supply and the solarium that way the horse owners pay for the power they need for the individual session under the solarium.

The casing is made out of stainless steel. The time per coin can be adjusted internally. The coin device has by default a timer that can count down from 99 minutes. The coin collector is completely integrated into the bottom and safely enclosed. Programming the coin device is very easy and to be adjusted at the inside of the device at the potentiometer.

Our available coin devices:

- Coin device for 0,50€
- Coin device for 1,00€
- Coin device for token coins
- Coin device for 5 different € coins

We also have coin devices with a water valve for water control.
